

STEM²D ISN'T HARD

By Sarah Carey, Ellen McWee, Jessica Doohan, Ciara Sookarry and Beatrice Gherbezan

If you enjoy it

How can we encourage more women to study STEM²D?

Say This:

"That subject is hard work but make sure to follow your interests" ✓

"The more women that study that course the better!" ✓

"Not many women have chosen that job" ✓

Not That:

"That subject is so hard!" ✗

"There's a lot of boys in that course" ✗

"That's a man job" ✗

Women Belong... In the Lab, On the Site, In STEM²D!

There are a lot of stereotypes about women's roles but don't let these stereotypes define you. Be true to yourself and your interests

Unsure STEM²D is for You?

- Attend University Open Days
- Talk to current STEM²D Students and People with careers in STEM²D

Visit the UL WiSTEM²D Society on Instagram for more

Where There's a Will There's a Way

What to do if STEM²D isn't available in your school:

- Introduce WiSTEM²D Clubs and Societies in Schools
- See if you can arrange to do the subject in a school nearby.
- Find a teacher outside of your school to teach you.
