Is it possible for a player to fix the rules of a video game for a better play experience?

In World of Warcraft, there is no election process to establish a leader. I have developed a tool that allows democratic discussions so that players can voice their opinions on conflicts.

Implementation

Communication protocol and data synchronization design

Original Design

Web-based ethical decision-making

Adaptation to the game

Study the API to implement the sketched design

Use of game elements for a better integration

needs for ethical decision-making?
